Content Matrix

THE MOST POWERFUL WAY TO MANAGE YOUR SHAREPOINT MIGRATION

Metalogix Content Matrix is the most powerful way to plan, migrate and organize your SharePoint sites, content and metadata. For more than a decade, Metalogix Tools and engineers have been trusted by thousands of clients for their SharePoint migration. Content Matrix provides a direct one-hop, high-fidelity migration to SharePoint 2013 or Office 365 from any previous version of SharePoint with zero downtime.

KEY FEATURES

Expert Pre-Migration Planning

For more than a decade, Metalogix Tools and engineers have been trusted by thousands of clients for their SharePoint migration. The insight of that experience has culminated in tools that plan and prepare your environment for a successful migration. Use Content Matrix, in conjunction with our free Migration Expert tool, to analyse, find and fix potential migration roadblocks.

Migrate Everything. In One Hop.

Migrate directly to SharePoint 2013 or Office 365 from any prior version in one hop. Site collections, lists, libraries, workflows, permissions, documents, version history... Migrate every aspect. Then, if requirements change, or you'd like to try alternate configurations, continue to migrate without worry – Content Matrix is licensed to allow unlimited testing.

KEY BENEFITS

► Migration with Zero Downtime

SharePoint is mission-critical and users demand availability. Migrate SharePoint by site collection, site, list, library, business unit, or department with zero downtime. Continue to use the old and run the new environment in parallel and use Content Matrix to simply migrate changes to your new farm when ready.

► Keep Sites, Content and Metadata Organized

Projects change, departments are reorganized and business needs evolve. Both your current and future site structure and information architecture can unravel and cause user confusion and errors. The Content Matrix Organizer feature empowers you, or optionally your site collection owners and users, to keep SharePoint sites, content and metadata in sync with business needs.

► Committed to Your Success

Metalogix is dedicated to your SharePoint migration success. Our complete Migration toolkit including tools like Content Matrix, bring the collective experience of thousands of migrations to your project. Leverage our world-class Client Support and our partnerships with key SharePoint vendors and Microsoft. We're serious about your migration.

Migrate to the Cloud: Office 365, Hybrid or Private

Content Matrix is a single product for migrating to both the Cloud or SharePoint on-premises. It is the easiest and most reliable way to move some or all of your content to Office 365 or other SharePoint Cloud providers. In fact, it has been selected by Microsoft as the only pre-approved SharePoint migration tool for migrating to Office 356 Dedicated.

Download, install and start migrating in minutes

Content Matrix is designed with ease in mind, downloading and installing in minutes. It connects directly to SharePoint and source systems either without requiring any server side components or with an optional install to provide additional powerful migration capabilities. Most importantly, it's easy to learn and use. Download the Content Matrix free trial or our free 25GB of migration using Content Matrix Migration Express and see for yourself how quickly you can be up and running.

Improve SharePoint Search

Ensure users can easily find the content they need on the first search. One of the most effective ways to improve search results is to improve metadata. During and after migration, Content Matrix can add, organize, and edit metadata based on content location and other properties.

Migrate File Shares and more

Migrate all business content into SharePoint without losing context or metadata. Content Matrix connects and moves terabytes of content from file shares, websites, blogs & wikis, Exchange Public Folders, PST files and eRoom content. Migrate the content, files, associated metadata and other relevant attributes such as permissions or information structure into SharePoint.
