Enhance the value of your Nintex investment with the Performance Approval Workflow Quick Start Package from Gig Werks

Gig Werks brings our expertise and understanding of our clients' needs to create high value, rapidly deployed business solutions. With the exorbitant amount of regulations placed on institutions today, ensuring your processes and procedures are compliant and that they can be easily validated to regulatory authorities is of the utmost importance.

With Gig Werks and Nintex this starter package delivers the ability to automate compliance demands, easily produce the reports today's firms need to have ready on and on demand and set the ground work for your Enterprises ever changing compliance journey

The Gig Werks Performance Approval Quick Start Package Includes:

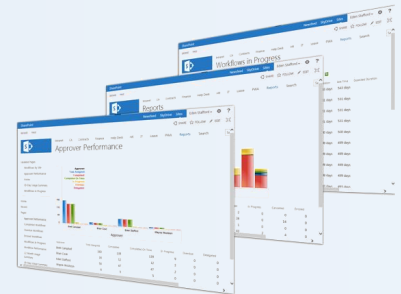

Implementation of Performance Approval Workflow Template

Validation of Use Case for Reporting

Development of Distributable Report for Regulatory Compliance

Proper Setup of Security Groups and Auditability of your solution

End User & Technical training to ensure user adoption and proper usage

Nintex Performance Approval Workflow

With the Performance reviews can be a time-consuming and onerous process for both employees and managers. Managers must follow up with team members to get reviews in on time and file them securely. Employees must remember when reviews are due, fill in complex templates and send attachments by email.

Automating the review process gives everyone increased visibility of review status.
